

Cintas Binding

Las cintas / BINDINGS Sauleda son la unión perfecta y duradera en los extremos de la lona.

Las cintas tejidas con hilos 100 % MASACRIL SOLUTION DYED, son resistentes a la decoloración por su alta resistencia a la luz solar, presentan una excelente repelencia al agua, así como un excelente comportamiento frente a la intemperie en el entorno marino.

Su tejido en forma de espiga es más adaptable, sea cual sea la forma del extremo de lona donde realizar el remate.

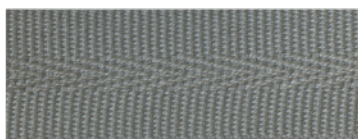

Sauleda BINDING tapes provide a perfect and durable union at the edges of the fabric.

The colour-fastness of the tapes, made in 100 % SOLUTION DYED MASACRIL yarn, is higher due to their high resistance to sunlight, and they have excellent water-repellent properties and behaviour in outdoor marine environments.

Their herringbone weave is more adaptable regardless of the shape of the fabric edge where the tape is applied.
