

WAFER SWING CHECK VALVE – DN32 (1"1/4) to DN600 (20") - PVC-U

Conform to the 2014/68/EU Directive

DN50 –PVC-U

MAIN FEATURES

- Solid check valve for an optimal mechanical resistance.
- Wafer mounting between flanges for a reduced bulk.
- Internal seals in EPDM or FPM on request.
- Given its operating principle, the non-spring version of this valve must be mounted vertically, the fluid flowing from bottom to top in the flow direction.
- The spring version of this valve can be mounted horizontally, but only the vertical mounting guarantees tightness in the non-flowing direction

Pressure/Temperature Summary

Type of Seals	Working Pressure	Working Temperature
		PVC-U
DN32 to DN125	10 bars at 20°C	0°C to +60°C
DN150 to DN200	6 bars at 20°C	
DN250 to DN300	5 bars at 20°C	
DN350 to DN600	3 bars at 20°C	

The mechanical characteristics of the FPM and FFPM seals subjected to an ambient temperature below -5°C require the implementation of proper insulation on the valves equipped with such seals. Contact us for more information.

Our valves are guaranteed for an average fluid velocity in the pipeline of ≤ 2 m/s. Please contact us with the working conditions for any higher speed.

CHEMICAL RESISTANCE

The chemical resistance of the valve is subject to the type of fluid, the temperature, the pressure, as well as the materials and seals of the valve.

Please contact us to have a personalized analysis of the resistance of one of our products to a given fluid
