

THE HEART OF EVERY GREAT MACHINE

Power, service and productivity in
exactly the way you want it

“

Our commitment to the
highest standards in the
products we make, services we
offer and our global distribution
network, is your **guarantee
of satisfaction – and always
has been.**

”

Over 85 years of innovation and excellence

Since 1932, more than 20 million Perkins engines have been chosen to power over 5,000 different machines, from tractors, hydraulic excavators and electric generator sets to marine propulsion and auxiliary applications.

To provide our global customer base with innovative and class-leading engines, we have invested in eight manufacturing locations around the world, while our distribution and service network serves over 180 countries. At every site, our talented people work in collaboration with customers to design, manufacture and deliver dependable engines which meet our customers' current and future needs.

Global investment, and engine consistency

Perkins invests continuously in world-class facilities.

As part of the Caterpillar enterprise, we offer expert design and development capabilities in all regions, and we manufacture to consistent quality standards – ensuring all our engines, from all our locations, meet the same global specifications. Committed to collaboration and engine integration, we have over 85 years dedicated experience of working alongside Original Equipment Manufacturers (OEMs) in the design, build and servicing of off-highway diesel and gas engines. Leveraging the skills, people and knowledge of our global distribution network, supported with truly global aftermarket services, we work with you to create, deliver and service dependable power, wherever you are in the world.

Power in the way that you want it

Perkins offers the world's widest selection of engines – and each power bracket has been optimised for maximum performance.

Available with an extensive choice of options, we're able to tailor our engines to meet your own unique power challenges. We know that reliability is critical to your reputation, and our world-class range of engines is designed and manufactured to work harder, for longer. Extensively tested and validated both in

real-world environments and our laboratories using advanced simulation tools, we build knowledge and experience into our product development programme. You can be confident that a Perkins engine will deliver a lifetime of dependable performance.

The world's widest range of power solutions

Whatever your application, whatever power and torque you demand, and whatever global emissions standards you are working to, you can be confident that Perkins has the right engine for your needs.

Meeting the needs of the world's industries

Perkins has always worked closely with OEMs to understand their requirements and real-world challenges.

Building their insights and feedback into our designs, we have developed an unrivalled range of robust and dependable engines for over 5,000 different applications – all backed up with round-the-clock support and parts availability. In addition, with the support of our global distribution network, we offer a flexible choice of service options to meet your needs precisely, enabling you to safeguard your investment and optimise your uptime.

Expertise in machine integration

With unrivalled off-highway experience and a global presence, we work in collaboration with you.

We support every step of the machine development process, from prototype solutions through to fully validated hardware tailored to your machine designs. Our unique Technology Integration Workshops (TIWs) lie at the heart of this process. By bringing your engineers and our specialists together in one room, we delve into the true technical detail, creating innovative power for your applications.

The **true benefit** of our engine validation work is the value that it brings to customers in **saving time and cost** during development.

Consistent collaboration, wherever you are

 Click each manufacturing location to
launch facility videos

We support your supply chain with manufacturing capability in the UK, USA, China, India and Brazil.

Featuring state-of-the-art computerised and robotic technology, each location operates a consistent production system and manufacturing process, ensuring every engine meets the same global standards. You'll be collaborating with an experienced supplier who delivers engines to the same specifications and quality wherever you are in the world, minimising time, risk and cost. With our local knowledge and commitment, we deliver consistent power, wherever you are.

Service options the way you prefer

With our global distribution network, we are able to meet all your needs locally.

Whether you want an engine, genuine part, approved service or technical guidance, our global distribution network and highly skilled Perkins engine experts are always on hand to provide you with dedicated and high quality product support, built around your needs. We have a range of added-value services, including a choice of flexible and transferable options such as Perkins® Platinum Protection which can extend the engine factory warranty by up to 10 years*, giving you peace of mind.

We have also introduced the Perkins® SmartCap† and Perkins® My Engine App to give you personalised and portable information about your engines and parts consumption. Combined with Perkins genuine parts, oils and coolant, we offer a comprehensive and customisable package to maintain your engine at optimum performance and reliability.

Understanding your objectives and working with you to achieve them

There is far more to Perkins than just engines; our collaborative approach with OEMs is focused on working as an extension of your teams.

We look to create strong and productive relationships which drive cost-efficiencies and profitability into every aspect of your business – from supply chain and logistics, through to marketing and product support options and activities. We have the experience, knowledge and commitment to add value across your enterprise and help you achieve your business objectives, having worked extensively alongside OEMs in the design, build and servicing of off-highway diesel and gas engines. Supported with truly global aftermarket services, we work with you to create, deliver and service dependable power, wherever you are in the world.
