

ELEVADOR HIDRAULICO

Elevadores hidráulicos dúplex, con un pistón central de doble efecto, doble cadena tipo "fleyer", perfiles en acero en forma de U calidad ST52.3 laminados en caliente, rodamientos axiales de rodillos reforzados, horquillas plegables, diversos movimientos: elevación, inclinación y desplazamiento.

Opcional:

A – Kit electro-válvulas.

B – Kit de ruedas giratorias.

C – Techo prensacajas hidráulico.

D – Uñas para la carga de balas redondas.

E – Pala hidráulica.

Su ligereza, pero al mismo tiempo robustez permite utilizar la carga al máximo con total seguridad, siendo este tipo de útil el perfecto socio para el agricultor.

ELEVATEUR HYDRAULIQUE

Élévateurs hydrauliques avec un système duplex à deux montants, un cylindre central de levage à double effet, double chaînes de type "fleyer", profilés en acier en forme de U laminés à chaud de qualité ST52.3, roulements à rouleaux axial renforcé, fourches repliables, divers mouvements: élévation, inclinaison et déplacement.

En option:

A – Sélecteur électro-hydraulique.

B – Kit roues tournantes.

C – Hydraulique de blocage de la charge.

D – Fourches pour le chargement des balles rondes.

E – Pelle hydraulique.

Sa légèreté, mais la robustesse permet d'utiliser la charge avec sécurité, il est le partenaire idéal de l'agriculteur.

HYDRAULIC ELEVATOR

Hydraulic forklift with a system duplex with two uprights, one double effect central lifting cylinder, double lifting chains type "fleyer", steel profiles in the shape of U hot rolled in ST52.3 quality, roller bearings axial reinforced, folding forks, several movements: vertical, inclination, displacement.

In option:

A – Electro-hydraulic selector.

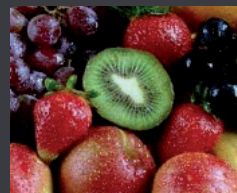

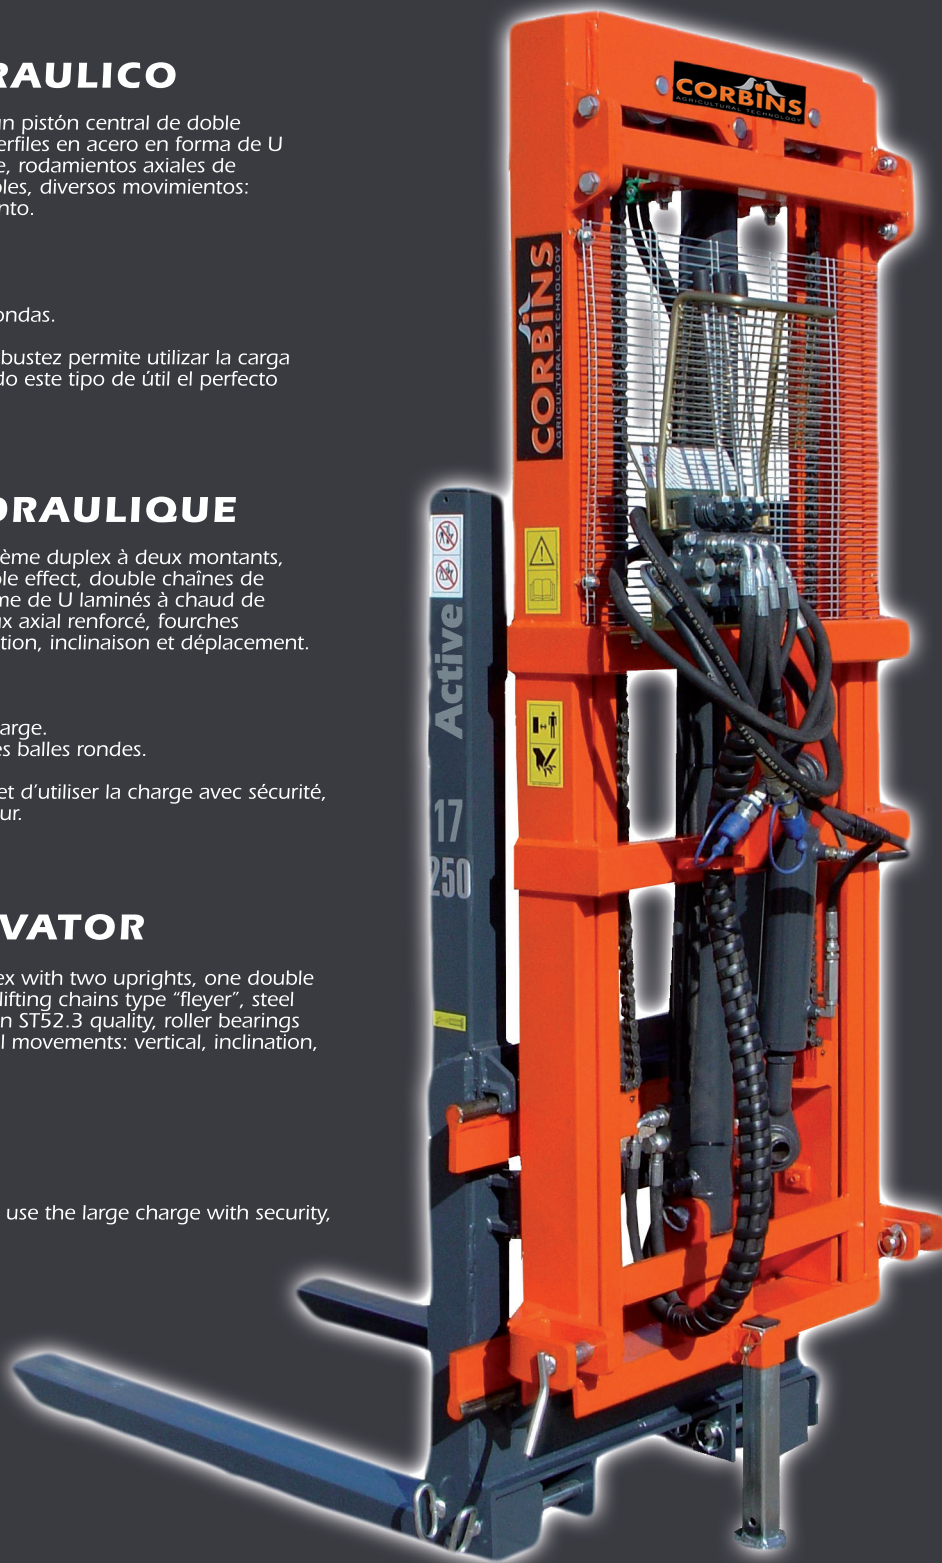

B – Wheels rotating kit.

C – Hydraulic load locking.

D – Points for loading round bales.

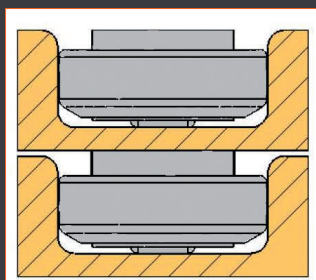

E – Hydraylic bucket.

Its lightness but robustness allows to use the large charge with security, it's the perfect partner of the farmer.
