Unlimited possibilities

## Multipurpose Hydra

Hydra is our multifunctional door designed for maximum application flexibility. It features an almost unlimited range of executions and options.

Reliable

## Strong and silent Pegasus

Pegasus is a multifunctional elevator door capable of withstanding heavy traffic in hotels, public buildings, hospitals and shopping centres.

Fast and quiet operation

## High performance B-HR

The ideal solution for high-rise elevators. It guarantees extremely fast opening combined with quiet and smooth operation. Elevator door technology at its best!

Vandal resistant  
Cat.2

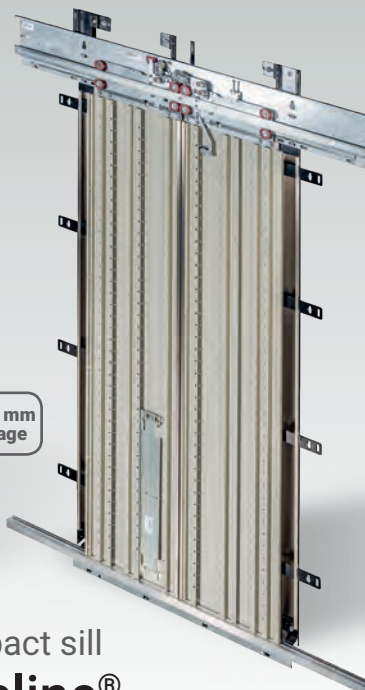

## Heavy duty B-G

A door designed for industrial and freight elevators. Reinforced vandal resistant components and sturdy design guarantee safety and reliability at all times.

85 or 115 mm  
sill package

## Compact sill Fineline®

Fineline incomparable compact sill design contributes to space saving: it can fit even in the smallest shafts.

Very limited  
weight and  
dimensions

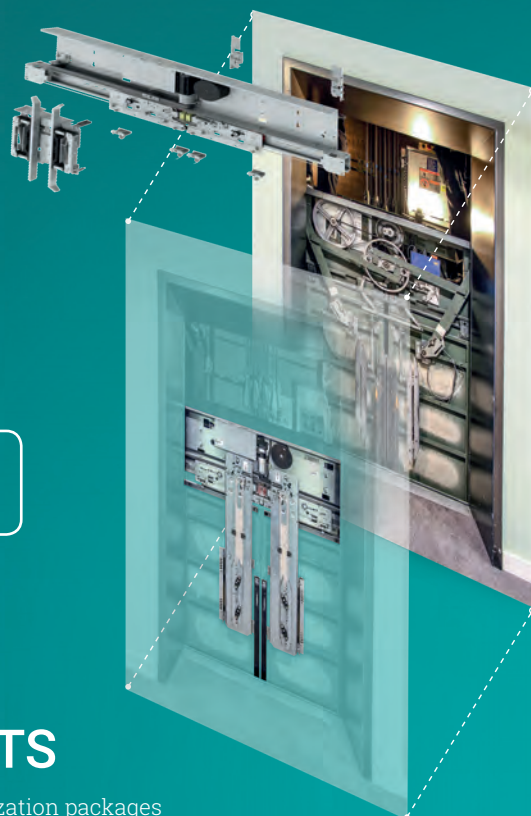

## Folding car door ECO BUS

ECO BUS is our light folding car door for modernization. Usually coupled with swing doors, it is perfect for those jobs that call for a car door with very limited weight and dimensions.

Solutions available  
for major Original  
Equipment  
Manufacturers

## MOD KITS

We offer modernization packages for a wide range of elevator doors from well-known Original Equipment Manufacturers.

### Up to 4 m/s

600 - 3500

1900 - 3500

Various

Fixed and dynamic

Various

Our modernization kits are supplied with all the customized interface components you need for your project: fixing kits, adapters for existing panels, special couplers to interface with landing doors or car door from the original equipment provider. No on-site adaptations required!

This makes your modernization work much easier and quicker.

- Complete or partial modernization kits available
- Car door modernization kits with retractable cam off-set to connect to existing landing doors
- Adjustable door lock to connect to existing landing doors
- Reduced mechanism height solutions for reduced inter-floor distance
- Panels hanging bolts and shoes can be adjusted to existing panels and sill
- Direct wall fixing without frames
- Wide range of frames and sill dimensions
- Frameless door execution can fit in very tight spaces
- Fire-certified executions with or without frames

### Spare Parts

Wittur ensures the long-term availability of original spare parts for all its elevator products. Using original spare parts is a guarantee of safe operations, continuous efficiency and best performance for your elevators. Contact our local sales team or visit our online platforms for further information.

# Special Projects

Combining flexible engineering and operations excellence for extraordinary projects

Round shape

Round, top or underdriven

## Luna

Luna round door is the ideal shape for prestigious and panoramic installations. It perfectly combines high-performance and good looks. It perfectly combines high-performance and good looks.

Light design

Straight underdriven

## Nettuno

Nettuno is designed from the start with underdriven panels. This special execution lightens the design of panoramic elevators, achieves a higher aesthetic harmony and accounts for a clean shaft appearance with almost no visible mechanical component.

Extra heavy  
duty

Non  
conventional  
solution

## Sturdy and special Taurus

Taurus is our solution for extra heavy-duty goods elevator and can reach huge openings up to 5 metres. Its robust structure is made to last in the most demanding applications.

## Optical coupling SWS

Featuring optical coupling, SWS door system is a smart, unconventional solution for inclined elevators and for all those applications where traditional mechanical coupling is not possible.

## Flexible engineering and operations excellence

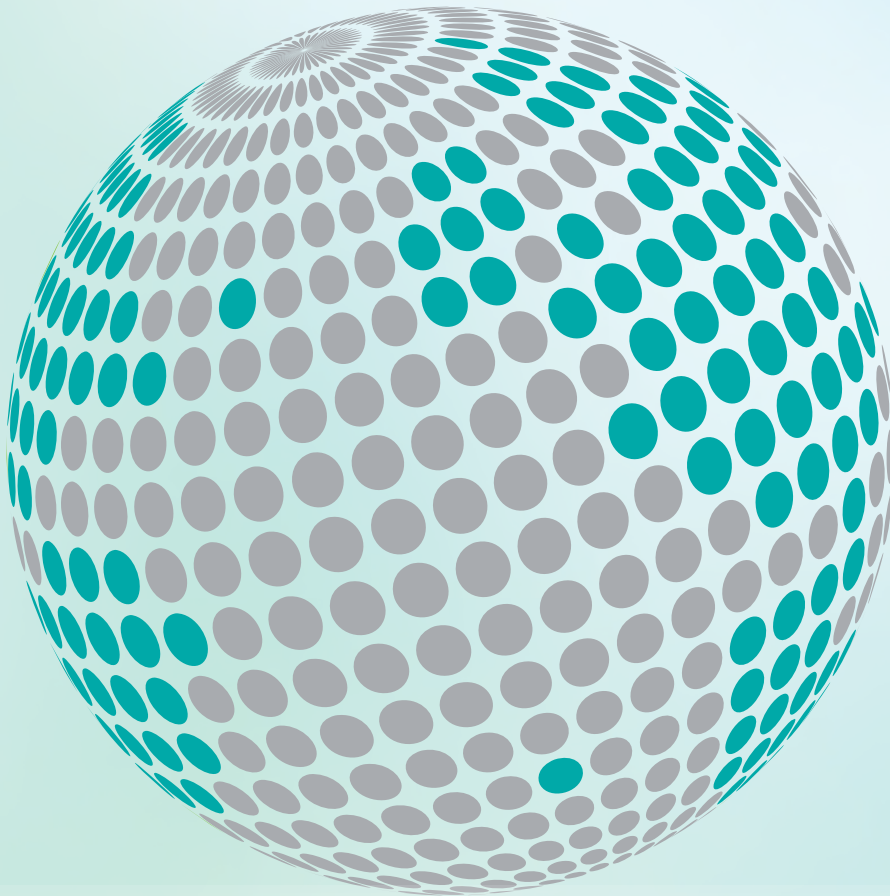

Wittur has been developing special elevator doors for almost 50 years. We work as partners in special projects to provide doors which fit with the original vision of the architect. At the same time we provide industrialised components with the same lifecycle and the same safety level of standard elevator doors.
