**QUALITY AND PRECISION
GUARANTEED**

LA MAGDALENA

La Magdalena fue fundada en el año 1957, convirtiéndonos en el primer fabricante estatal de árboles de transmisión a cardan.

Colaboración

Desde el principio nuestro objetivo ha sido colaborar con el cliente para conocer sus necesidades y poner a su disposición nuestra capacidad técnica para resolver cualquier problema. Siempre buscamos la solución más adecuada para los fabricantes, distribuidores y, por supuesto, para el consumidor final, el agricultor.

I+D

Para ello contamos con un laboratorio propio donde nuestro equipo de técnicos e ingenieros desarrollan labores de diseño y de investigación continua para la mejora de la calidad de nuestros productos y para la introducción de mejoras en el mercado.

Futuro

La Magdalena es una empresa sólida que está creciendo y evolucionando de forma constante en los últimos años. En la actualidad está implantada en más de 60 países, acercándonos a nuestros clientes para dar un servicio rápido, eficaz e integral.

The Magdalena factory was founded in 1957, becoming the first state-wide manufacturers of universally-jointed transmission shafts.

Working together

From the beginning our aim has been to work together with the customer in order to get to know their needs and place our technical capabilities to resolve any problems at their disposal. We always look for the optimum solution for manufacturers, distributors and, of course, for the end consumer –the farmer.

R+D

To this end, we have our own laboratory where our team of technicians and engineers undertake design tasks and ongoing research aimed at the enhancement of quality of our products and at taking on board improvements in the market.

Future

La Magdalena is a solid enterprise wich has been growing and evolving over the past few years. It is currently present in over 60 countries, thus bringing our products closer to our clients for a more rapid, efficient and integrated service.

LA MAGDALENA

AVISO

De acuerdo con la Directiva sobre Seguridad en las Máquinas, que rige en los países de la C.E., la Transmisión que trabaja en el exterior de la máquina debe permanecer siempre protegida, declinando por nuestra parte cualquier responsabilidad en caso de no cumplir con este requisito.

Los Protectores de Seguridad de LA MAGDALENA se hallan fabricados conforme a dicha Directiva.

WARNING

According with EEC Directive refering Safety at the Machinery, PTO drive shaft working outside the implemment must always be protected, declining by our side any liability due to not complying with this requirement.

LA MAGDALENA'S PTO Safety Guards are manufactured according mentioned Directive.

ÍNDICE / INDEX

Tipo y Serie de Transmisión / Type and series of Pto Drive Shafts	6-7
Modelo de Transmisión, Potencia y Par a transmitir / Model, Power and Torque to transmit	8
Crucetas para Aplicaciones Agrícolas / Crosskits for Agricultural applications	9
Tubos, Tubos Rilsan y Varios / Tubes, Rilsan tubes. Miscelanea	10-11
Transmisiones Agrícolas con tubo limón / PTO Drive Shafts with lemon profile tube	12-13
Transmisiones Agrícolas con tubo triangular / PTO Drive Shafts with triangular profile tube	14-15
Transmisiones Agrícolas con tubo estrella / PTO Drive Shafts with star profile tube	16-17
Transmisiones Agrícolas con eje cuna / PTO Drive Shafts with spline shaft profile	18-19
Despiece, Tabla de Medidas y Precios para Transmisiones Agrícolas Homocinéticas /	
Spare Parts, Prices and Sizes table for C.V Joint Drive Shafts	20-22
Horquillas Exteriores / End Yokes	24-38
Horquillas Exteriores para Nudo Homocinético / Standard end yokes for Wide Angle Joint	39
Órganos de Seguridad / Safety Devices	42-63
Rueda Libre y su despiece / Free Wheel Clutch and spare parts	42-43
Rueda Libre de Pestillos y su despiece / Lock Free Wheel and spare parts	44-47
Limitador de Par de Pitones y su despiece / Pin Torque Limiter and spare parts	48-49
Limitador de Par de Fusible y su despiece / Shearbolt Clutch and spare parts	50-51
Embrague de Discos a Fricción y su despiece / Disc Friction Clutch and spare parts	52-57
Limitador de Par Automático y Despiece / Cam Type Cut-out Clutch and spare parts	58-61
Embrague de Discos a Fricción con Rueda Libre y Despiece /	
Disc Friction Clutch with Free Wheel and Spare Parts	62-63
Despiece y Medidas del Nudo Homocinético / C.V. Joint Spare Parts	64
Órganos de Seguridad para Nudo Homocinético / Safety Devices for Constant Velocity Joint	65
Introducción a la Protección de Seguridad / Safety Guard Introduction	66-68
Protectores de Seguridad. Despiece / Safety Guards and spare parts	69-71
Recambio / Spare Parts	74-81
Instrucciones de Seguridad y Mantenimiento / Safety and Maintenance Instructions	82-83

ELEMENTOS TELESCÓPICOS

Los perfiles telescópicos LA MAGDALENA están estudiados para compensar las variaciones de longitud de la transmisión durante el trabajo, manteniendo un margen de resistencia a la torsión adaptado a la dimensión de la transmisión.

Nuestros diferentes perfiles permiten un adecuado centraje de la transmisión y, a su vez, distribuyen la fuerza transmitida, de manera uniforme, sobre las nervaduras.

Para aplicaciones específicas disponemos de perfiles con tratamiento de superficie.

TELESCOPIC ELEMENTS

Telescopic profiles LA MAGDALENA have been studied to compensate during performance, PTO drive shafts length changes, keeping a resistance margin to breakdown adapted to the transmission dimension.

Our different profiles allow a suitable centering of the transmission and, at the same time, power is distributed to the ribs uniformly.

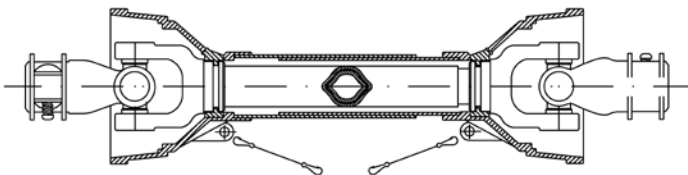

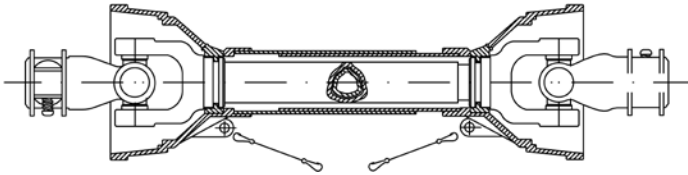

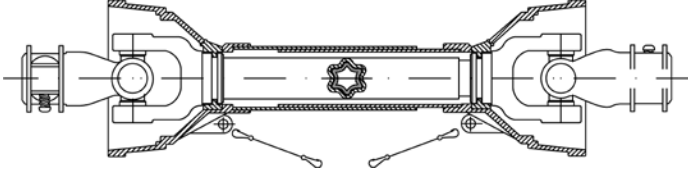

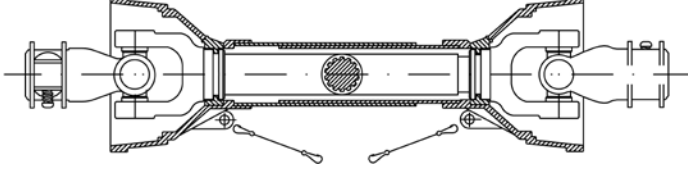

Profiles with surfacing treatment are available for specific applications on request.

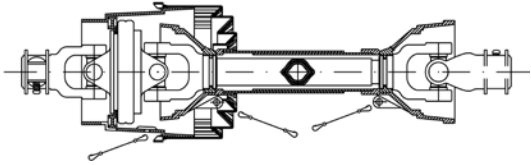

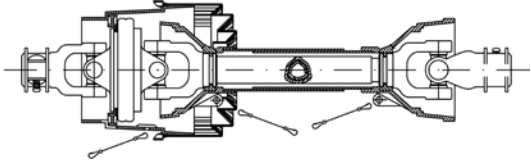

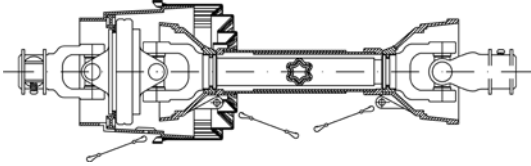

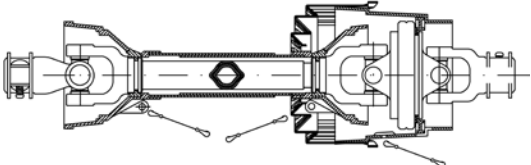

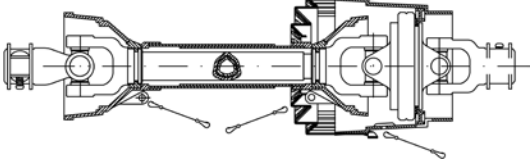

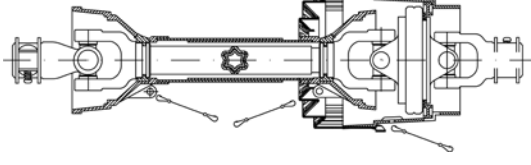

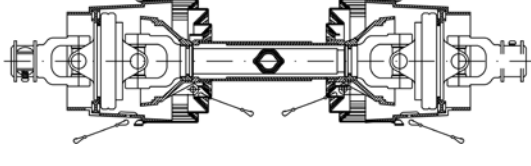

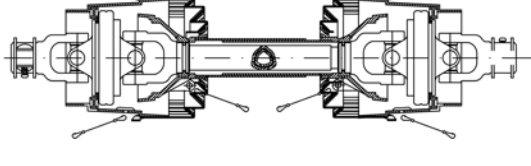

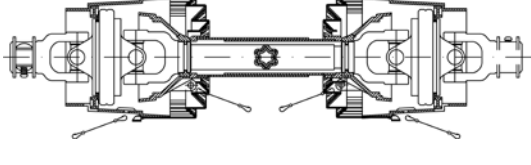

ELEMENTS TELESCOPIQUES

Les profils télescopiques LA MAGDALENA sont conçus pour compenser les variations de longueur de la transmission au cours du travail, tout en conservant une marge de résistance à la torsion adaptée à la dimension de la transmission.

Nos différents profils permettent de centrer la transmission de façon appropriée et, à leur tour, ils distribuent la force transmise, de façon uniforme, sur toutes les nervures.

Nous disposons de profils avec traitement de surface, pour des application espécifiques.

SERIE SERIES SERIES 100	Con tubo perfil deslizante telescópico tubular. Tubular telescopic sliding profile tube. A tube profil, glissant, télescopique, tubulaire.	
SERIE SERIES SERIES 200	Con tubo perfil deslizante telescópico trilobular. Three-lobed telescopic sliding profile tube. A tube profil, glissant, télescopique, trilobé.	
SERIE SERIES SERIES 300	Con tubo perfil deslizante telescópico y eje tipo estrella. Telescopic sliding profile tube and star shaft. A tube profil, glissant, télescopique, et arbre type en étoile.	
SERIE SERIES SERIES 500	Con perfil telescópico ranurado de estría envolvente. Telescopic profile, splined with encircling grooves. A tube profil télescopique, rainure enveloppante.

INTRODUCCIÓN A LA PROTECCIÓN DE SEGURIDAD · SAFETY GUARDS

La PROTECCIÓN del Arbol de Transmisión a Cardan es un elemento indispensable en la seguridad personal del usuario.

El menor contacto con elementos en rotación (la transmisión) provoca graves y hasta fatales accidentes.

La Magdalena exige, de acuerdo con las normativas de seguridad vigentes, la utilización y comercialización de las transmisiones exteriores y de conexión entre el tractor y la máquina ÚNICAMENTE CON PROTECTOR.

La Magdalena sugiere al fabricante de Maquinaria Agrícola y distribuidores en general, que a su vez exijan al usuario la utilización de la transmisión con protección, advirtiéndoles que la prevención de accidentes depende sobre todo de su control en la seguridad. Es importante que el fabricante de Maquinaria Agrícola indique que la conservación siempre en buen estado de la protección evitará accidentes.

The PTO Drive Shaft GUARD is an indispensable element in the personal safety of the user.

The slightest contact with a rotating element (the drive shaft) can result in serious and even fatal accidents.

In accordance with existing safety legislation, La Magdalena requires external drive shafts for connection between tractor and machinery to be used and sold ONLY WITH A SAFETY GUARD.

La Magdalena recommends that Farm Machinery manufacturers and distributors in general require the end user to use the drive shaft with the safety guard in place, reminding them that the prevention of accidents depends mainly on observing safety precautions. It is important for the Farm Machinery manufacturer to indicate on a corresponding adhesive sticker that proper maintenance of the safety guard will help to prevent accidents.

La PROTECTION de la Transmission à Cardan est un élément indispensable dans la sécurité personnelle de l'utilisateur.

Au moindre contact avec des éléments en rotation (la transmission) peut provoquer de graves, et même de fatals accidents.

La Magdalena exige, d'accord aux les normes de sécurité en vigueur, l'utilisation et la commercialisation des transmissions extérieures et de connexion entre le tracteur et la machine UNIQUEMENT AVEC PROTECTEUR.

La Magdalena suggère aux fabricants de Machines Agricoles, et aux distributeurs en général, d'exiger à leur tour à l'utilisateur de se servir de la transmission avec protection, en leur signalant que la présence d'accidents dépend surtout de leur contrôle de la sécurité. Il est important pour le fabricant de Machines Agricoles d'indiquer à l'aide d'un autocollant, que la conservation en bon état de la protection évitera que les accidents se produisent.

PROTECTOR DE SEGURIDAD · SAFETY GUARD · PROTECTEUR DE SECURITE

Protector homologado de acuerdo a las certificaciones CE.

Guard approved in accordance with European Directive CE.

Protecteur homologué suivant les Directives européennes CE.

LA MAGDALENA incorpora en su protector una pegatina indicativa sobre las precauciones que el usuario debe tomar antes de operar con la transmisión.

También incorpora un MANUAL DE INSTRUCCIONES por cada transmisión.

Recomendamos que antes de colocar la transmisión para su funcionamiento, sea leído el manual y la pegatina, y se sigan rigurosamente sus instrucciones.

With its guard, LA MAGDALENA includes an instruction sticker which users should read and observe before operating the drive shaft.

It also includes an INSTRUCTION MANUAL for each drive shaft.

Before fitting the drive shaft for operation, we recommend reading the manual and sticker, strictly following the instructions contained therein.

LA MAGDALENA incorpore dans son protecteur un autocollant qui indique les précautions à prendre par l'utilisateur avant d'opérer avec la transmission.

Elle incorpore aussi un MODE D'EMPLOI pour chaque transmission.

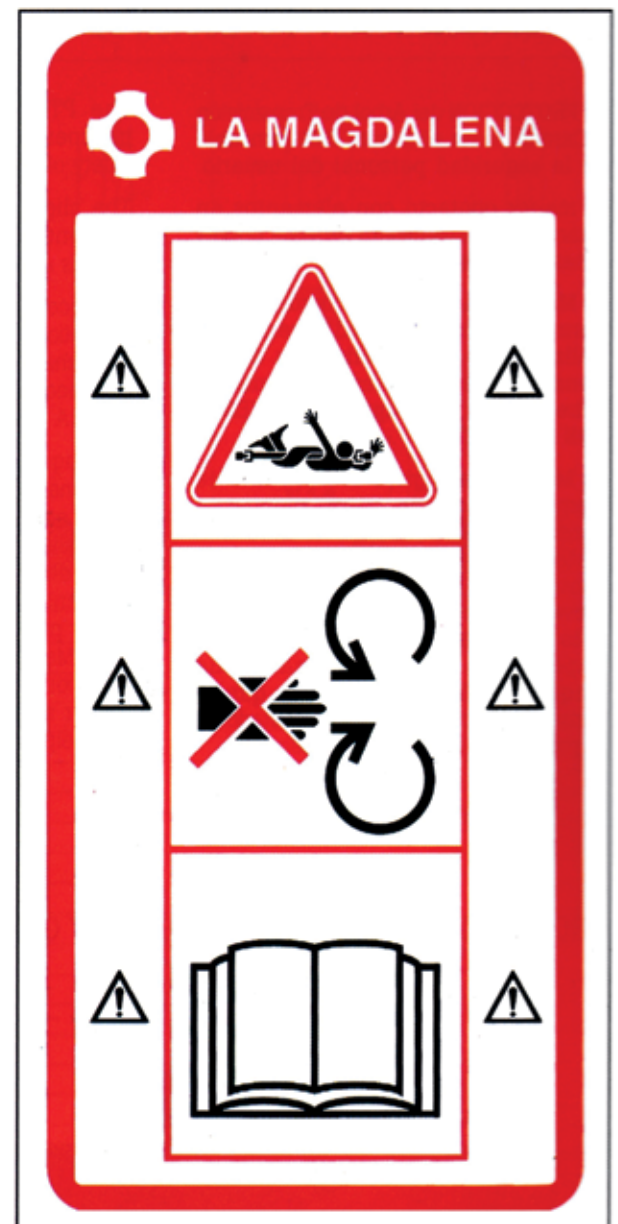

Avant de placer la transmission et de la faire fonctionner, nous conseillons de lire attentivement le mode d'emploi et l'autocollant et de respecter scrupuleusement leurs indications.

SIGNIFICADO DE LOS ICONOS

Evitar llevar prendas sueltas que pueda engancharse en las partes rotativas, ya que se pueden originar graves accidentes.

Apagar el motor y quitar las llaves del tractor antes de acercarse a la máquina o antes de efectuar cualquier operación de mantenimiento.

Leer atentamente este manual y el de la máquina antes de toda utilización o intervención.

MÁS VALE CINCO MINUTOS DE LECTURA Y APLICACION, QUE CINCO MESES DE INACTIVIDAD Y CONTRATIEMPOS.

FIVE MINUTES OF READING AND APPYING INSTRUCTIONS CAN SAVE FIVE MONTHS OF DOWNTIME AND LOST PRODUCTIVITY.

MIEUX VAUT CINQ MINUTES DE LECTURE ET D'APPLICATION, QUE CINQ MOIS D'INACTIVITÉ ET DE CONTRETEMPS.

Las transmisiones destinadas a EE.UU. y CANADA, bien sueltas o incorporadas a las máquinas, deben de llevar además una pegatina en la protección y otra de peligro en el tubo exterior metálico.

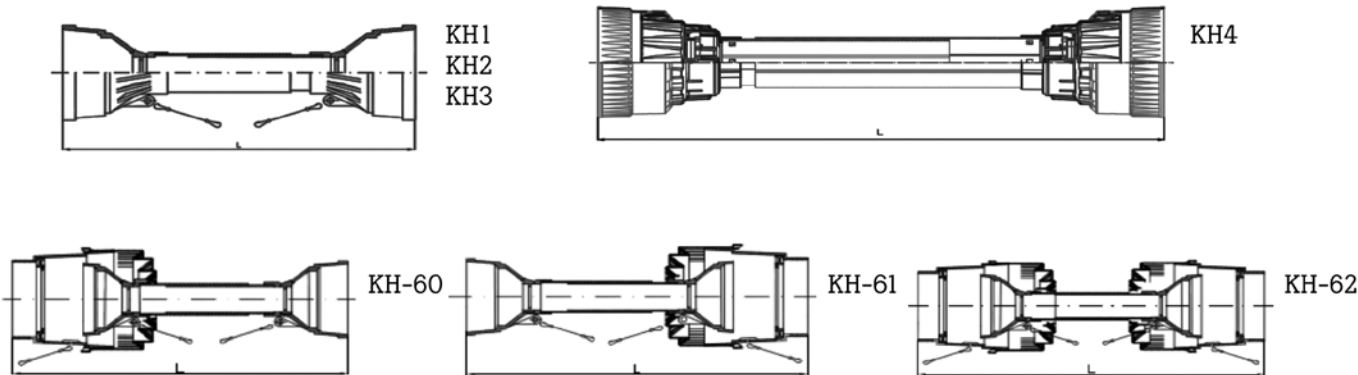

Drive shafts to be shipped to the United States and CANADA, whether alone or as part of a machine, must carry a sticker on the guard as well as on the exterior metal tube.

Les transmissions destinées aux USA et au CANADA, aussi bien détachées qu'incorporées aux machines, doivent porter un autocollant sur la protection et un autre sur le tube extérieur métallique.

INSTRUCCIONES DE SEGURIDAD Y MANTENIMIENTO / SAFETY AND MAINTENEMENT INSTRUCTIONS

RL	16 h.	RLP	16 h.	LP	8 h.
LF	32 h.	ED-RLP	16 h.	ERL	16 h.

Utilizar la máquina con la Transmisión de Cardan adecuada en cuanto a modelo y longitud, órganos de seguridad y protección. Emplear tanto la Transmisión Cardan, como su protector y órganos de seguridad, solo y únicamente para el uso al cual se destinan.

Do use the implement with appropriate PTO drive shaft in terms of model, length, guard and safety device. Use both the PTO drive shaft and the guard as well as safety devices strictly for the use for which they are designed.

Il faut utiliser la machine de transmission à cardan appropriée en ce qui concerne le modèle et la longueur, dispositifs de sécurité et protection. Uniquement on doit utiliser la transmission à cardan et son protecteur et dispositifs de sécurité pour l'usage établis.

Utilizar únicamente las transmisiones con protector. Comprobar que todos los componentes de la protección tanto del tractor como de la transmisión y de la máquina se encuentran en perfecto estado y funcionan correctamente, antes de comenzar a trabajar. En caso de que falten piezas o estas estén dañadas sustituir las por otras nuevas.

Only use transmission drives with protectors. Before starting to work, check that all protection components, both for the tractor and the transmission drive are in perfect condition and function correctly. If parts are missing or damaged, replace with new ones.

Il faut utiliser uniquement les transmissions avec protecteur. Vérifiez-vous que tous les composants de la protection ainsi que la transmission et la machine sont en bonne condition et qu'ils fonctionnent parfaitement avant de commencer à travailler. Si nous manquons des pièces ou qu'elles ne sont pas en bonne condition, il faut les changer.

Antes de comenzar a trabajar comprobar que la Transmisión esté correctamente fijada a la toma fuerza.

Before starting to work, check that the PTO drive shaft is correctly fixed to the power takeoff.

Avant de commencer à travailler, vérifiez-vous que la transmission est correctement fixée à la prise.

Antes de aproximarse a la máquina o de efectuar cualquier operación de mantenimiento comprobar que el motor esté parado y las llaves fuera del contacto.

Before approaching the machine or carrying out any maintenance operation, check that the motor is stopped and that the keys are not in the contact.

Avant de s'approcher de la machine ou d'effectuer n'importe quelle opération de maintenance, vérifiez-vous que le moteur est arrêté et les clés sans contact.

Evitar el contacto con la Transmisión cuando esté en movimiento, evitando el uso de prendas amplias que pudieran engancharse a la misma.

Avoid contact with the PTO drive shaft when it is in operation and moving, avoiding the use of loose or long garments, etc. that might be caught in moving machinery.

Évitez-vous le contact avec la transmission en mouvement, en évitant l'usage de vêtements amples pour qu'elles ne s'accrochent pas à la machine.

En la Transmisión estándar es importante no sobrepasar los 30° de ángulo de trabajo. La junta Homocinética permite trabajar con ángulos de hasta 80° por breves periodos de tiempo.

With the standard PTO drive Shaft it is important not to go beyond the 30° working angle. The Wide Angle Joint enables working at angles of up to 80° for brief periods of time.

Avec la transmission standard c'est important ne pas dépasser les 30° de l'angle de travail. Le joint homocinétique permet de travailler avec des angles jusqu'à 80° dans des brèves périodes de temps.

Respetar las indicaciones señaladas en el manual de engrase del fabricante.

Respect the manufacturers instructions in the manual regarding lubrication.

Respectez-vous les indications du manuel sur le graissage du fabricant.

En caso de trabajo nocturno, iluminar la zona de la Transmisión para las operaciones de enganche y trabajo.

When working at night, illuminate the area of the PTO drive shaft for coupling and work operations.

Au cas du travail nocturne, allumez-vous la zone de la transmission pour les opérations du accochage et travail.

Los discos de embrague, las ruedas libres, limitadores etc, pueden alcanzar altas temperaturas, mantenga la zona de alrededor libre de materiales inflamables. Evite deslizamientos prolongados.

The clutch discs, the free wheels, limiters, etc, can reach high temperatures. Keep the work zone free of flammable materials. Avoid prolonged slipping.

Les disques d'embrayage, les roues libres, limiteurs, etc. peuvent atteindre des hautes températures; empêchez-vous d'occuper la zone avec matériaux inflammables. Évitez-vous des glissements longs.

INACTIVIDAD. Después de un tiempo de inactividad, verificar todos los componentes de la transmisión y engrasar.

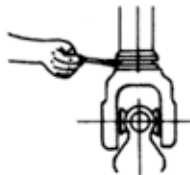

INACTIVITY. After an inactivity period, check every transmission parts and then proceed to lubricate.

INACTIVITE. Après quelque temps d'inactivité, vérifiez tous les composants de la transmission et procédez au graissage.

INSTRUCCIONES PARA EL MONTAJE DEL PROTECTOR:

INSTRUCTIONS TO SET THE PROTECTOR:

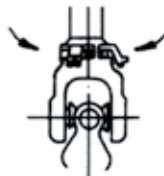

INSTRUCTIONS POUR LE MONTAGE DU PROTECTEUR:

Limpiar y engrasar la ranura de alojamiento del collarín.

Clean and lubricate the collar housing groove.

Nettoyer et graisser la rainure de logement du collier.

Sujetar la transmisión en posición vertical e introducir en la ranura del collarín y observar su perfecto giro.

Hold the transmission vertically, insert the collar into the groove and check its perfect rotation.

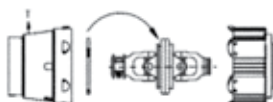

Fixer la transmission en position verticale, introduire le collier dans la rainure et vérifier sa parfaite rotation.

Posicionar los alojamientos del cono con las aletas del collarín. Presionar verticalmente y comprobar que las aletas se hallen introducidas en los alojamientos del cono dando unos ligeros golpes en el cono hasta verificar su perfecto estado.

Set the cone housings according to collar fins. Press down and check to introduce the fins into the cone housings by knocking slightly on the cone to get a thorough location.

Mettre les fenêtres du cône en face des ailettes du collier. Faire pression verticalement et assurer que les ailettes sont bien introduites dans les fenêtres du cône en tapotant sur le cône jusqu'à ce qu'on vérifie qu'il est parfaitement enclenché.

Introducir el collarín en la ranura. Colocar el cono y enroscar los tornillos. Montar la malla protectora sujetándola en las lengüetas del cono protector con la ayuda de un destornillador.

C.V. JOINT. Insert the retaining bearing onto the groove. Fit the cone and set the screws on. Using a screwdriver, fix the protective mesh to the protective cone.

NOEUD HOMOCINETIQUE. Introduire le collier dans la rainure. Placer le cône et enrouler les vis. Avec l'utilisation d'un tournevis, ajuste la maille protectrice au cône protectif.

INSTRUCCIONES PARA EL DESMONTAJE DEL PROTECTOR:

HOW TO UNSET THE PROTECTOR:

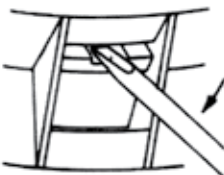

INSTRUCTIONS POUR LE DE MONTAGE DU PROTECTEUR:

Sujetar la transmisión en posición vertical.

Hold the transmission vertically.

Fixer la transmission en position verticale.

Presionar el cono hacia abajo y liberar las aletas de fijación del collarín apalancando con un destornillador por la ranura de la aleta del collarín hacia el interior.

Press down the cone and release the collar fixing fins using a screw-driver as a lever to press inward on the fin groove.

Faire pression sur le cône vers le bas et dégager les ailettes de fixation du collier se servant d'un tournevis pour exercer une pression sur la rainure de l'ailette vers l'intérieur.

Sacar de la transmisión el conjunto cono-tubo, y sacar el collarín de su alojamiento.

Draw out the cone-tube assembly from the transmission, and the collar from the housing.

Enlever de la transmission l'ensemble cône-tube et le collier de son logement.

Desmontar la malla protectora de las lengüetas del cono protector con la ayuda de un destornillador. Desenroscar los tornillos. Sacar el cono y el collarín.

C.V. JOINT. Undrive the screws. Remove the cone and the retaining bearing. Unscrew the mesh from the protective cone.

NOEUD HOMOCINETIQUE. Dévisser les vis. Extraire le cône et le collier. Dévisser la maille du cône protectif.
