

EASY FOLD

The **EASY FOLD** is the new patented folding system that can be positioned in line with the "PIT STOP" creasing machines. This allows working with paper and cardboard up to 600 g ensuring a perfect crease and fold without the cracking of the spine fibres, deforming of the paper, board and cardboard.

The exit conveyor belt is equipped with special roller system ensuring accurate handling and pressing of the material without damaging the print. When run Online to a D2HSPEED it is particularly suitable for finishing the "legs" of desk calendars (Thumb Punching, 3 creasing, folding and wire punching).

Used Online to a Pitstop DGLINE the **EASY FOLD** is ideal for creasing and folding of digital prints for the production of PHOTO BOOKs.

The addition of a universal interface allows all existing PIT STOP and DGLINE machines to be run in line using the **EASY FOLD** with minimal operator intervention giving a fully flexible finishing solution.

TECHNICAL FEATURES

Size Max cm 50x100 / inch 19,68x39,37

Size Max cm 20x20 / inch 7,87x7,87

Speed A4 with 1 fold, 3500 sheets/h

MACHINE'S INFORMATION

Length cm 120 / inch 42,24

Width cm 95 / inch 37,40

Height cm 140 / inch 55,11

Net weight KG 170

take it **EASY**
crease and **FOLD** *with no limits*
